CERTIFICATIONS EARNED

- Data Science ProDegree — Imarticus Learning Institute
  May 21
- Power BI — Pluralsight
  May 21
- SQL For Data Science — UC Davis, Coursera
  Jun 21
- ThoughtSpot Professional Certification — Thoughtspot
  Oct 23
- Certified ThoughtSpot Data Expert — Thoughtspot
  Oct 23
- Certified ThoughtSpot Architect — Thoughtspot
  Oct 23
- Certified ThoughtSpot Cloud Architect — Thoughtspot
  Oct 23
- Snowflake Hands-On Essentials (Data Warehousing, Data Applications & Data Sharing) — Snowflake
  Nov 23

DHINESH C RAJAN

SENIOR DATA ENGINEER | SNOWFLAKE | PYSPARK | SQL | DBT | AWS | AI & DATA PLATFORMS

PERSONAL PROFILE

5+ years of experience designing cloud-native data platforms, building scalable ETL pipelines, optimizing Snowflake workloads, and delivering AI-powered analytics solutions. Skilled in Python, SQL (Postgres, Snowflake), dbt, Airbyte, AWS, and ThoughtSpot. Proven track record delivering scalable data solutions and embedding AI-driven analytics into enterprise workflows.
Experienced in Python automation, API integration, and SQL optimization for large-scale analytical workloads. Passionate about democratizing insights through self-service BI, prompt engineering, and modern data practices that support business-critical decisions.

WORK EXPERIENCE

Senior Solutions Analyst

ThoughtSpot Analytics Private Limited || Sept 23 - Sept 25

- Benchmarked and evaluated LLMs (GPT, Gemini, Claude) for Spotter using ThoughtSpot TML to boost prompt accuracy and reasoning consistency by 10%, improving overall Spotter performance and business reliability.
- Developed and implemented a sophisticated TML (ThoughtSpot Modeling Language) query normalization system that standardizes complex analytical queries, handling date buckets, aggregations, and multi-dimensional filters while maintaining semantic integrity.
- Engineered a comprehensive data sanitization pipeline that processes and normalizes diverse query formats, implements intelligent phrase splitting, and handles complex edge cases including date filters, nested aggregations, and multi-value comparisons with 99% accuracy.
- Developed a multi-page Streamlit analytics dashboard for Spotter accuracy metrics, featuring real-time data exploration, interactive visualizations and comprehensive formula dependency analysis, enabling stakeholders to efficiently analyze TML query sanitization patterns and make data-driven decisions.
- Delivered embedded analytics experiences directly within client-facing applications, boosting user engagement and adoption through tailored, search-driven insights.
- Collaborated with cross-functional teams to identify business requirements and translate them into technical solutions to develop cs_tools.

SKILLSET

- **Programming Languages**: Python
- **Databases**: PostgreSQL, Snowflake, AWS RDS, Elastic Search
- **Cloud Platforms**: AWS (S3, Lambda), Kubernetes, Databricks
- **Data Engineering**: dbt Labs, Airbyte, Hevo, Dagster Orchestrator
- **Analytics & BI Tools**: ThoughtSpot Analytics, Power BI, Metabase, Streamlit
- **AI/ML Technologies**: LLM Models (ChatGPT, Claude 3.7, Gemini), Prompt Engineering
- **Python Libraries**: SciPy, ReportLabs, Transformers, Tiktoken, LangChain
- **DevOps & Automation**: Jenkins, CI/CD, N8N
- **Collaboration Tools**: Lark

STRENGTHS

- Collaborative Leadership
- Self-Directed Excellence
- Professional Integrity
- Technical Adaptability
- Stakeholder Engagement

EDUCATIONAL HISTORY

MECHANICAL ENGINEERING |
AUG 2013 - MAY 2017

TRP ENGINEERING COLLEGE SRM GROUP

PROJECTS

LLM/SLM based Salary Extraction & Data Enrichment Pipeline

- Built a batch-processing salary extraction and enrichment pipeline for unstructured job data, using LLMs with O*NET, NAICS, exchange-rate and salary-category context; implemented candidate scoring, retries, edge-case handling and validation, scaled the pipeline to process 200K+ records daily, using explicit and dynamically optimized prompt instructions to improve recovery of missing salary attributes and reduce under-recovery cases.
- Continuously optimized prompts and validation logic to enforce consistent formatting, schema adherence and snake_case outputs, achieving 0 contract violations in the validated dataset while reducing dependence on smaller proprietary LLMs; trained and evaluated Gemma and Qwen SLMs for domain-specific enrichment using Claude

Senior Data Analyst

SagasIT Analytics Pvt Ltd || Jul 21 - Sept 23

Center for Education Market Dynamics

- **Background**: The Project is an Ed-Tech project funded by Bill and Melinda Gates foundation and focuses on improving the quality of education and providing accessibility to all data available with respect academics.
- **Tools and Technologies used**: DBT, Snowflake, PostgreSQL, Docker, AWS, Metabase, Django, REST API, Airbyte, Hevo, N8N Automation, Dagster Orchestrator, Kubernetes.
- Set up ETL pipelines by extracting data from public sources using Python, transforming it with DBT, and delivering it to end users via API and Metabase.
- **Data Pipelines**. Modern Data Stack Implementation – Built scalable ETL pipelines with dbt, Airbyte, and Snowflake, improving data freshness for dashboards by 40%.
- **Data Transformation**. Transforming the raw data into insights and then deriving with meaningful information in dbt. Syncing dbt and Metabase dashboards via exposure.
- Built and deployed REST APIs using Django on AWS ECS, set up Postgres on RDS, and automated Python scripts and tasks using EC2 and Lambda.

Tabula (Tabula.io formerly known as Retable Analytics)

- **Background**: The project is an tool comparison where the client has built a tool called Tabula (Visualization Software). **Technologies**: dBT, Tabula.
- Responsibilities includes setting up ETL pipelines by extracting the data available from their data source and to check the efficiency of the software with comparison to dbt Labs and QlikSense.

24 Hours Of Lemons

- **Background**: To do visualize on Geo Analytics and Marketing and the Race Events. **Technologies:** AWS, Power BI.
- **Data Visualization:** Designed customized data collection models for specific visualization tasks. Developed intelligence-sharing dashboards, providing company-wide access to collected data.
- Implemented business intelligence solutions to increase operational efficiency. Created dashboards to monitor and track key performance indicators.

Software Associate

Capgemini Technology Service India Limited || Jun 19 - Jun 21

- Authored comprehensive support documentation that enabled users to independently resolve issues, reducing support requests by 25%.
- Analysed request type and issues to identify troubleshooting methods needed for quicker remediation.
