

DHINESH C RAJAN

SENIOR SOLUTIONS ANALYST

PERSONAL PROFILE

Senior Solution Analyst with end-to-end expertise in data pipelines, cloud-native analytics, and AI-powered solutions. Skilled in Python, SQL (Postgres, Snowflake), dbt, Airbyte, AWS, and ThoughtSpot. Proven track record in delivering impactful, scalable data solutions and embedding AI-driven search and analytics into enterprise workflows. Passionate about democratizing insights, enabling self-service BI, and solving complex problems through prompt engineering and modern data practices.

Experienced in writing efficient Python scripts for data transformation, automation, and API integration, accelerating workflow execution and reducing manual effort. Strong foundation in relational and cloud-native DBMS systems with a focus on schema design, performance tuning, and query optimization for large-scale analytical workloads. Effectively leverages Python, SQL, and dbt to orchestrate robust data models that feed into real-time dashboards, supporting business-critical decisions.

WORK EXPERIENCE

Senior Solutions Analyst

ThoughtSpot Analytics Private Limited || Sept 23 - Present

- Benchmarked and evaluated LLMs (GPT, Gemini, Claude) using ThoughtSpot TML to boost prompt accuracy and reasoning consistency by 30%, improving overall model performance and business reliability.
- Crafted dynamic, visually compelling visualizations in ThoughtSpot, enabling users to uncover patterns, identify trends, and drive strategic decisions through intuitive, well-formatted charting capabilities.
- Collaborated with cross-functional teams to identify business requirements and translate them into technical solutions to develop cs_tools.
- Pioneered prompt engineering strategies for LLMs (GPT 3.5–4.1, Gemini 2.5, Claude 3.7), including Text2SQL conversion and dynamic template selection, to boost model accuracy and contextual relevance.
- Applied AI-driven reasoning frameworks to fine-tune LLM outputs for complex problem-solving and enterprise-level data querying.
- Delivered embedded analytics experiences directly within client-facing applications, boosting user engagement and adoption through tailored, search-driven insights.

Data Analyst

SagasIT Analytics Pvt Ltd || Jul 21 - Sept 23

Center for Education Market Dynamics

- **Background:** The Project is an Ed-Tech project funded by Bill and Melinda Gates foundation and focuses on improving the quality of education and providing accessibility to all data available with respect academics.
- **Client:** EdSolutions

CERTIFICATIONS EARNED

📖 Certified Thoughtspot Cloud
Architect || Thoughtspot
Oct 23

📖 Data Science ProDegree from
Imarticus Learning Institute
May 21

📖 Power BI || Pluralsight
May 21

📖 SQL For Data Science || UC Davis,
Coursera
Jun 21

SKILLSET

- dBT Labs
- Snowflake, PostgreSQL
- Python
- ThoughtSpot Analytics
- Power BI, Metabase
- Airbyte, Hevo [Data Integration Platform]
- AWS RDS, AWS S3
- LLM Models ChatGPT, Claude3.7
- N8N, Dagster Orchestrator, Kubernetes.

STRENGTHS

- Team player
- Self-motivated
- Active listening
- Strong work ethic
- Communicating
- Versatility

EDUCATIONAL HISTORY

MECHANICAL
ENGINEERING |
AUG 2013 - MAY 2017

TRP ENGINEERING
COLLEGE SRM GROUP

- **Tools and Technologies used:** DBT, Snowflake, PostgreSQL, Docker, AWS, Metabase, Django, REST API, Airbyte, Hevo, N8N Automation, Dagster Orchestrator, Kubernetes.
- Responsibilities includes setting up ETL pipelines by extracting the data available from US government websites and from other open sources via Python, then transforming the data using DBT tool and then share the data with end users via API and Metabase. Other Responsibilities include connecting with clients and gathering their requirements into tickets, then create sprints in Jira board, and assign the tickets to Team and respective stakeholders.
- **Data Visualization Of Education Curriculum.** Creating dashboard on Metabase with SQL Queries to visualize the end users from collection of data from various raw reports.
- **Data Pipelines.** Modern Data Stack Implementation – Built scalable ETL pipelines with dbt, Airbyte, and Snowflake, improving data freshness for dashboards by 40%.
- **Data Transformation.** Transforming the raw data into insights and then deriving with meaningful information in dbt. Syncing dbt and Metabase dashboards via exposure.
- In this project I have also worked on Devops including development of REST API's on Django platform from scratch and then deploying them to AWS ECS, Setting up Postgres in RDS, Automating python scripts using AWS EC2, Lambda functions and then automating other tasks.

Tabula (Tabula.io formerly known as Retable Analytics)

- **Background:** The project is an tool comparison where the client has built a tool called Tabula (Visualization Software).
Technologies: dBT, Tabula.
- Responsibilities includes setting up ETL pipelines by extracting the data available from their data source and to check the efficiency of the software with comparison to dbt Labs and QlikSense.

24 Hours Of Lemons

- **Background:** To do visualize on Geo Analytics and Marketing and the Race Events. **Technologies:** AWS, Power BI.
- **Data Visualization:** Designed customized data collection models for specific visualization tasks. Developed intelligence-sharing dashboards, providing company-wide access to collected data.
- Implemented business intelligence solutions to increase operational efficiency. Created dashboards to monitor and track key performance indicators.

Software Associate

Capgemini Technology Service India Limited || Jun 19 - Jun 21

- Authored comprehensive support documentation that enabled users to independently resolve issues, reducing support requests by 25%.
- Analysed request type and issues to identify troubleshooting methods needed for quicker remediation.
